1633.
Maur. 1633.

A Prognostication

for the yeere of our LORD
GOD, 1633. Being the first
after the Bissextile or Leap
YEERE.

Wherein is declared the state of
the 4. Quarters of the yeere, the
Eclipses, and other things of
good consequence.

With diuers pretty notes and pleasant
obseruations fit for all sorts
of people.

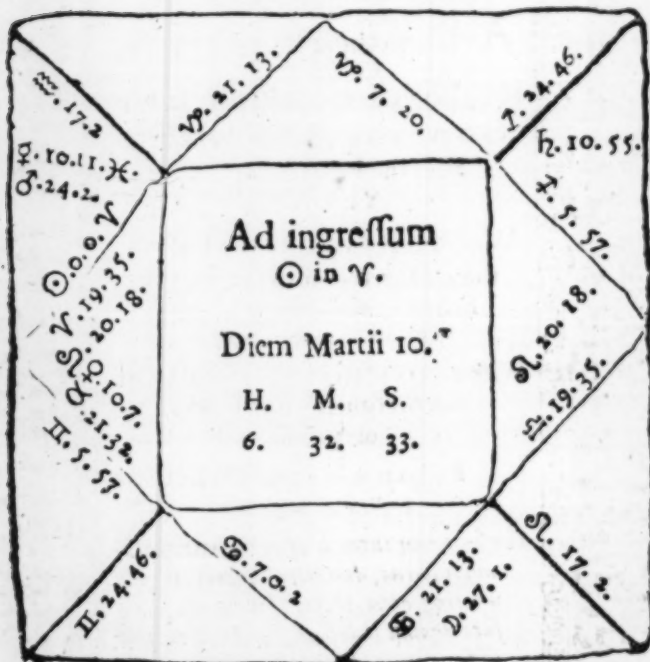

By JOHN VAUX of Saint
Hellen Awckland.

*The soule that turneth after such as haue sa-
miliar spirits, and after Wizards, to goe a
whoring after them, I will euē set my
face against that soule, and will cut him
off from among his people, Leuit. 20. 6.*

Imprinted at London for the Compa-
ny of STATIONERS.

A Prognostication.

*Dispositiones Cæli ad Tychonis Calculum
accommodatæ, 1633.*

That soever man intreats vpon, which cannot
be proued by a visible demonstration, is holden
imaginary; according to which, if the rules of
Astrology bee to bee credited, it is very likely that
this Winter will take a temperate farewell, and
the Spring time following not bulikely to be very
seasonable, with some moyst dewes, and misty
windes

Vaux. 1633.

winds. And thus much may be prognosticated by this figure, the rest I will leaue to those censorious Criticks, who brand the liberall Art of Astrology with the base title of cozenage, and say, there are no houses in heauen: And yet our blessed Saviour said vnto his Disciples, In my Fathers House are many Mansions, *Iohn 14. 2.* And I pray thee Zoilus, where is his Fathers house? Is not Heauen his Throne? *Mat. 5. 34.* Is there is Caelum Emptium, a superiour and commanding Heauen, so there are subordinate and obeying heauens. For it is said that Diutius Paul was taken vp into the third Heauen, *2 Cor. 12. 2.* All which testifie vnto vs, that there are more than one; which Blockhead Ignorance the diametrall or opposite enemy of knowledge cannot comprehend. For as in a Kings Palace, there are many roomes besides those which are prepared for the Kings owne person and presence, where none come, but whom hee will admit of, and call vnto him. Euen so in the Heauen of Heauens, the incomprehensible, and incomparable Palace of all pleasure, the very fullnesse of ioy, is Gods dwelling, where his Saints and Angels are alwaies attending being euer ready to do his pleasure, either in the Wyre, Earth, or Seas. Nam si eunt septem sunt Planetæ, ita septem sunt Angeli, qui adsunt ante faciem Dei voluntatem eius perpetrari, *Ren. 16. 7, 2, 3, 4, 8, 10, 12, 17.* And we haue not a day in a weeke which doth not deride the Latine name from one of the seven Planets. And as there are diversities of dignities and callings amongst men here vpon earth: Euen so amongst the Planets in the Heauens: There is one glory of the Sunne, another of the Moone, and another glory of the

A Prognostication.

Starres; for one Starre differeth from another Star in glory, 1 Cor. 15. 41. Neither is it heathenish to intreat of Planets, alwaies provided that wee commit no idolatry to attribute moze vnto them than is fitting, but praise God in his admirable workmanship: For the Heauens declare the glory of God, *Psal.* 19. 1. Much moze might bee said in the defence of Astrology, which Sir Christopher Heidon hath largely answered against Master Chambers; whereunto I referre the Reader, and so conclude.

Vertue (as meeke as Camomile)

While Vice doth chide, in scorne will smile,

So Camomile trode vnder foot,

In spite of malice still will sprout.

A true description of the foure quarters of the yeere.

VVinter.

Winter (according to Astronomieall computation) began the 12. day of December, 1633. at what time the Sunne entred into the first minute of the Southerne and tropicall signe Capricornus, making the dayes shortest, and the nights longest, at which time he began his Northerne Progress towards the Equator. This quarter is of its owne nature cold and dry, at which time the earth is at rest, and ceaseth to bring forth, that it may gather together again, and recover the lost strength against Summer,

mer, from whence Winter most commonly bindeth the earth, which it warmeth and couereth with snow as with a garment, and refresheth it with store of raine, for snow and ice are comfortable to Cōrne, and bringeth plenty of all things. And after the Sunne hath accomplished his last degrees vnder Aquarius and Pisces, hee openeth the earth with new and pleasant gales of winde, and prepareth the Spring time. And this is the general and proper temperament of euery quarter of the yeere, which is alwaies to be considered in Meteorology, lest that we speake of flowers in Winter, and of ice in Summer.

Of the Spring.

The Spring beginneth at the Sunnes entrance into the first minute of Aries, making then the daies and nights of an equall length throughout the world, which shall bee this yeere the eleuenth of March. This quarter is by nature hot and moist; for then the Sun is both come nearer vnto his verticall point, and also to Carres of a hotter nature, causing thereby the dryer winds to blow; of which is Subsolanus, and Fauonius, called the West windes, wherewith superfluous humors are washed and consumed, the seeds conueniently sowne, and the ground stirred and made fit to bring forth; which setteth forward Trees, Vines, flowers, and Leaues, and bedecketh the earth with Grasse and Hearbes. But because the new and tender Cōrne lately sprung vp, requirerh moistning showers, there ariseth in the morning Pleiades, Hyades, and Orion, and in the euening Arcturus, tempestu-

A Prognostication.

ous and moist starres, which stirreth by raine and moist windes. At the length the Sun (comming to Gemini) moueth a conuentient and temperate heat to the former seed time.

Of Summer.

Summer beginneth at the Sunnes ingresse into the first minute of the Northerne and Tropicall signe Cancer, which will bee the 12 of Iune. This quarter is by nature hot and dry, at whose beginning there ariseth Presope, Alelli, and other fixed Starres of a moystning vertue, from whence by the Sunnes access is stirred by raine to bring forward Corne and other fruit. But after that the things growing from the earth haue attained a full increase, and by heat, waxeth toward maturation and ripenesse, the Sunne approaching the hot signe Leo, there ariseth Syrius and Procion, which are Starres of a hot constellation: Therefore great heat is stirred up, to the tempering whereof the Ethesian windes blow in the day time; afterward the Sunne comming to Virgo, the said heat is mitigated by little and little, and at the rising of Arcturus it bringeth raine.

Autumne, or Haruest.

Autumne beginneth the 14. of September, when the Sunne entreteth into the first minute of the equinoctiall signe Libra, making then the nights equall with the dayes. This quarter is by nature cold and dry, for the heat ceaseth with the Summer passed. And although plentifull Showers doe then

Vaux. 1633.

then fall, so that the Vintage is then abundant, and the Winter seed-time is made more commodious: yet notwithstanding the remaining heat of the aire which by the Sunnes access to hot Starres in Sagittarius, is somewhat increased, and the moisture of the earth drawne by, and the ground cherished and prepared for the Winter following, lest cold coming on a sudden, might hurt the seed and winter Cozne.

Of the Eclipses this yeere

I 6 3 3.

There will be two Eclipses onely this yeere, and both of the Sun.

The first Eclipse of the Sunne, according to the Gregorian account will bee the 8. day of Aprill, but according to our English or Julian account the 29. day of March, at thre a clocke in the afternoon.

The second Eclipse of the Sunne will bee the third day of October, according to the foreigne computation, but according to our Julian account the 23. day of September, at seven a clocke in the morning.

Of the County or Moneth Court.

NO County from henceforth shall bee holden, but from moneth to moneth; and where greater time hath bene vsed, it shall bee kept so still. Magna Charta cap. 35. And afterward in the time

A Prognostication.

of King Edward the sixth, this Maior terminus was restrained to a moneth onely, as followeth :

No County, Court or Courts, hereafter to bee kept within this Realme, shall be longer deferred, but one moneth from Court to Court, and to the said Courts from hencefoorth shall bee kept every moneth, and none otherwise; any blage, custome, Statute, or law, heretofore had or made to the contrary in any wise notwithstanding 2 Edw. 6. cap. 25. The necessity of keeping this Court every moneth, and vpon a day certaine, is by reason of the Kings Writs of Exigents, which must bee read there. Yet neuerthelesse Durham County Court is kept contrary to the Law every foureteenth day throughout the whole yeere, to the great oppression of the Country: Sicque Lex fit Exlex, & Legislator legis violator. Scimus autem quod bona sit Lex, si quis ea legitimè utatur, 1 Tim. 1. 8. Peradventure I may bee blamed for being too plaine. Howsoever, I am moued to publish the truth by a right worshipfull person.

Here

Here followeth a Table, plainly explaining
the Act against Usury, 21. Iacobi cap. 17. An.
Dom. 1624. It was enacted that no man should
take for his money above eight pounds in the
hundreth for a whole yeere: that is to say, for
euery five Crownes two shillings, &c. As in
the Table following.

The principall being	l.	s.	Will yeeld according to eight in the hundredth.	l.	s.	Interest.
	82	10		6	12	
	83	15		6	14	
	85	0		6	16	
	86	5		6	18	
	87	10		7	0	
	88	15		7	2	
	90	0		7	4	
	91	5		7	6	
	92	10		7	8	
	93	15		7	10	
	95	0		7	12	
	96	5		7	14	
	97	10		7	16	
	98	15		7	18	
	100	0		8	0	

This Table is to be read thus.

The principall being 1. l. 5. s. will yeeld according to 8. in the 100. 0 l. 2. s. Interest, and so of all the other summes following. The forbearance of five shillings three pence for a whole yeere, will be worth at the yeeres end, according to 8 in the 100. five pence. The forbearance of twelve shillings six pence for a whole yeere, will be worth at the yeeres end, according to 8. in the 100. twelve pence : And so of all greater sums as in the last Table : which increasing from five Crowns to 400. which makes 100. pound, is easie enough without any familiar example,

Vaux. 1633.

example, because you haue at the end of any broken
or whole summe vnder 100 pound, the iust interest
placed directly against it.

And there is none that can rightly compute it
otherwise. For you cannot reckon it iustly by the
rate of euery pounds, but either your account will
exceed or come short. For if you shall take but 19. d.
the pound, it will come due groats short of 8 in the
100. and if you shall take 9. pence farthing for the
pound, it will come to eight pound 5. pence for 100.
pound, and so exceed. But to finde out the truth,
doe thus: diuise your 100. pound into eight equall
parts, (because it is rated at 8. in the hundredth,)
and it will bee right times 12. pound 10. shillings.
For which (according to the statute) you giue or
take eight times 20. shillings, which is eight pound.
And for all lesser summes, I referre you to the Ta-
ble. When money was lent for 10. in the hundredth
the Borrower paid for 4. Crownes two shillings,
but now being rated at eight in the hundredth, it is
due Crownes for two shilling for a whole yeere.

Of the distinction of ages fitting to
bee remembred.

The yeere is diuided into parts, for either wee
intreat of the time of peregrination, or of the
distinction of ages, or of the comming of our
Lord. The time of peregrination may be said to be
twofold, that is to say, either of the life contem-
platiue, which is mentioned in that space of time,
which is betwixt Epiphany & Septuagesima, where-
in the mozall Lawes are read: or of the life actiue
which

which we set forth from this Sunday vntill Aduent Sunday, that is to say, when the Histories of the Kings and Prophets are recited.

The time of the distinction of ages, wee speake off from SEPTVAGESIMA vntill Easter. For in Septuagesima is represented the beginning of the world, and of the first age from Adam. In Sexagesima is set forth the beginning of the second age from Noah. In Quinquagesima (which some call Esto mihi) is declared the third age from Abraham. In Quadregesima (which is the first Sunday in Lent) is mentioned the beginning of the fourth age from Moses. In the first Sunday inclusively from Quadregesima is represented the beginning of the fifth age from David. In the Passion of our Lord, called Good-fryday is represented the beginning of the sixt age from Christ our Saviour. So in the feast of the Pasche, or Easter, is represented the seventh age, which belongeth to Glorification. And in the next Sunday following, which the Latines call Dies Dominica in albis, but more vulgarly Low-Sunday, we vnderstand the vniuersal Resurrection and life eternall. Which number of ages is also represented by the number of the seven dayes of the weeke, according to the nature and quality of euery of the seven Planets, from whom the said dayes doe borrow their names. The time of expectation is represented in Aduent: And it may be vnderstood foure waies; that is to say, of the last Iudgement, of the Saviour coming into this earthly world, reconciling the Sinner, and calling to glory. All which are manifested by the readings and Gospels which are then recited vpon the Sundayes in Aduent.

Why

A Prognostication.

Why the Church keepeth the memori-
all of these Feasts, and why they
are called moueable.

Septuagesima is so called, because it contained 70. dayes: for it beginneth a dominica in qua cadit Alleluia, and is extended Ad diem dominicam in albis. The Church celebrateth this feast in remembrance of the 70. yeeres wherein the Children of Israel liued in captiuitie in Babylon. The first Sunday in Lent, is called Quadragesima, because that from this Sunday Vique ad cenam Domini, are contained forty dayes, and the celebration of this feast is kept, as a memoriall that Moses fasted 40. daies when he receiued the Decalogue: or else because Christ fasted 40. dayes, and ouercame the temptations of the Diuell. Pascha (saith Saint Hierom) hebraicè dicitur Phase, non a passione (vt plerique arbitrantur) sed a transitu nominatur: because the destroyer seeing the blood vpon the doore-posts of the Israelites, passed by and stroke them not. The Church solemnizeth this feast in remembrance that Christ dyed and rose againe, and thereby passing from death to life, made (as noteth Saint Augustin) a way for vs that beleue his Resurrection; that we also may passe from death to life, according to the saying of our Lord: Qui credit in me transit a morte ad vitam. The Sunday going before Rogationum ieiunium, is commonly called Rogation Sunday, for that the Church (at this time) was wont to vse Processions, and (therewith) Prayers of thanksgiving to G D D, for the fruits then growing

A Prognostication.

growing vpon the earth, with intercession for the further blessing thereof to perfect ripenesse, for mans behoofe. Some suppose that these Processions (now called perambulations) were used pecerely, for the better continuance of the knowledge of the limits and out bounds between Parish and Parish. Pentecost is as much to say, as the space of fifty dayes, because that between Easter day and Whit-sunday (inclusiuelly) are 50. daies. The Church continueth the solemnity of this feast in remembrance of the Law given to Moses by God vpon the sry Mountatne, on the 50 day after the departure of the Children of Israel out of Egypt. And for that the Holy Ghost (in visible signe of fiery tongues) came downe (as on this day) vpon the Apostles. This day was called (in the language of our great Grandfather) Whitsunday.

The reason why these Feasts are said to bee moueable.

These feasts are termed moueable, because they follow the Primations and course of the Moone, and therefore haue not (annually) any fixed or standing place in the Kalender. The reason hereof is, for that these feasts are alwayes to stand (in the Kalender) for Sunday, partly because the Solar yeere, consisting of 365. daies and 6. houres, being Hebbdomaticall (that is diuided into 52. weekes) there is one odde day: partly because those six houres put together every four yeere, doe make *Diem intercalarem*, which causeth
the

the Leape yeere, therfore these feasts cannot continually fall vpon a certaine day of the moneth, like as the other feasts (ranging ouer all the daies of the weeke) ordinarily doe; which therfore are called fixed or standing feasts.

Of the difference betwixt the fixed and moueable Feasts.

Iohn Steffler (the Phoenix of Astrologians of his time) In Calend. Rom. prop. 31. setteth downe this difference betweene the fixed or standing feasts (saith he) Nullum continent in se mysterium, aut Sacramentum; but onely continue the remembrance of a thing on that day done. But the moueable feasts (ouer and aboue the memorizall of a thing done) habent in se mysterium aliquod; so that besides, that they also beare the type or figure of a thing past, or to come. The day of Christs Nativity, pointeth at nothing to come, but sheweth onely that Christ on that day, viz. the 25 of December was borne, Non ergo celebratur ob Sacramentum. But the feast of Easter, ouer and besides a thing on that day done, (hoc est) immolationem agni eo die factam habet in se arcanum & sacramentum, because it was a figure of a thing to come: namely the offering vp of Christ his most blessed body vpon the Crosse, for the redemption of mankind, and a representation of a thing past, to wit, the deliuerance of the Children of Israel out of captivity vnder Pharoah in Egypt.

Of the difference of these feasts (much like to this effect) writeth Saine Augustine lib. 2. Ad in-

A Prognostication.

quisitiones Ianuarii cap. 1. and 2. So both Saint Hierome also, in Epistola de celebratione Paschæ.

To these moueable feasts may bee added Ascension day, which is alwaies the Thursday next after Rogation Sunday.

Aduent Sunday is so called, De aduentu Domini: The holy Church hath taken foure Sundayes immediately going befoze Christmasse, to make as it were a solemne preparation for the comming of Christ into this world; therefore they be called the Sundayes of Aduent, and the whole time is called the holy time of Aduent. And this Sunday is alwaies the fourth Sunday befoze Christmasse, and is peereley altered according to the diuersity of of the dominicall letter; for

When	{	B	is Dominica call Letter	{	27	} of Nouember.
		C			28	
		D			29	
		E			30	
		F	Aduent Sunday shall bee the	{	1	} of December.
		G			2	
		A			3	

Also when	{	B	is Dominica call Letter, Christmas day shall fall vpon	{	Sunday.
		C			Saturday.
		D			Fryday.
		E			Thursday.
		F		{	Wednesday
		G			Tuesday.
		A			Sunday.

A Prognostication.

Now obserue thus much with mee.

The world was created in six dayes, Genes. 1. These by computation of the Scriptures, seeme to note vnto vs 6000. yeeres, 2 Per. 3. 8. Psal 90. 4. Again Adam fel vpon the sixth day, which is a Sympathie of the worlds end, within six thousand yeeres.

Now, (for our comfort) as our first Adam transgressed the Law of God vpon Ill Friday the sixth day of the weeke: so our second Adam fulfilled the Law of God vpon Good Friday the sixth day of the weeke:

And so the Womans seed,
Did bruisse the Serpents head,
And suffered for vs all,
To raise vs from that fall.

Now according to the computation of our ecclesiasticall Chronologers 5560. of those yeeres are already past. So then there wants to make vp 6000. yeeres compleat, but onely 440. which the Lord will shorten for his Elect sake, Mat. 24. 22.

But the day and houre is onely knowne vnto God, Mat. 24. 36.

Notwithstanding, the signes forwarning vs of that day, are daily in our sight: And seeing that in probability the sixth day of the worlds week is now expiring: I will end as I began:

Watch and Pray.

Vaux. 1633.

O Lord at our last dreadfull day,
Accept thy Christ for vs we pray,
Who did for vs fulfill thy Law,
Which none but he could doe we know:
And for our finnes did suffer death,
His merits Lord to vs bequeath,
And grant vs pardon hence for aye,
That wee with him may rest alway.
Amen, say thou O heauenly King,
And wee shall *Alleluiah* sing.

FINIS

An Abstract of a direction, concerning Reall Contracts.

WHosoever shall desire to purchase, or put to Sale, to take in Lease, or let to Farme, to Grant Assigne, Exchange, or otherwise to contract, or Deale, with or for any Lands, Leases, Rents, Annuities, Mansion-houses, Offices saleable, or other Estates, of what yeerely value soever, or to save any such from danger of Forfeiture, through the want of present money: May either in their owne names, or in the name of any other trusted by them, haue secure means with all privacie requisite: for the speedy effecting what shall be desired, in any the Cases aforelaid, or the like: At the Porcht-house against St. *Andrewes* Church in Holborne, *LONDON*.

God saue our gracious King *Charles*.
